

### **Tech-Serve to build Manos Amigas Clinic**

SATC is pleased to announce it signed an agreement with Tech-Serve International to work in collaboration with each other to build the Manos Amigas medical and dental clinic in La Entrada. Tech Serve will order steel and construction materials from the US and ship to Honduras. They will rely on their team of specialists, working with native laborers, to construct the clinic.

*Wes Syverson, president of Tech Serve International, signs a partnering agreement with Serving at the Crossroads to build the new Manos Amigas medical clinic in La Entrada*

Friendships and neighborly conversations led to Serving at the Crossroad's introduction to Tech Serve International, a world-wide mission support organization outside Little Rock, Arkansas. This non-profit group sends engineers, tradesman and technicians, volunteering their skills to help build social infrastructure projects, to impoverished parts of the world. In addition to areas of need in the US, they most recently worked in the Amazon region of Peru, Chad, Honduras, Kenya, Mexico, Niger, Philippines and Uganda where they constructed churches, orphanages, telephone systems, guest houses, radio stations, electrical towers, hospitals and clinics.
